

ARGO SERIES SLCM

The Next-Gen 360° Concreting Solutions

*Available only in select models

The Next-Gen 360° Concreting Solutions

Reg. Off.: Ajax Engineering Pvt. Ltd., #253/1, 11th Main, 3rd Phase, Peenya Industrial Area, Bengaluru - 560 058, CIN No: U28920KA1992PTC013306, T: +91 80 6720 0082, 6720 0083

ARGO SERIES

In the 1990s, AJAX was the pioneer in introducing the concept of Self-Loading Concrete Mixer (SLCM) to our nation standing by the values, beliefs & hopes of millions of concreting workers' households and now, it has become the largest SLCM manufacturer in the world. AJAX provides complete concrete solutions in supporting the infrastructure sector thereby boosting Infrastructure Economy. ARGO Model's mantra is 'Maximum Productivity; Optimal Investment': Doing more with less; One extra-ordinary machine that can do the work of 10 ordinary men will result in very good savings in terms of Return on Investment. The unrivalled versatility and efficiency would greatly deliver a reliable mix producing optimal concrete batches resulting in greater productivity with minimal skill or effort involved that can be operated at ease by an operator. AJAX Engineering Pvt. Ltd., has launched its new range of CEV Stage-IV ARGO SLCMs that entail a series of new ARGO products to meet a wide range of applications for customers.

The new CEV Stage-IV engines are more environment friendly with well proven CRDi technology and after treatment system that reduces emission levels. The New AJAX ARGO SLCM offers a host of features that provide highest productivity as well as value added features like Load Cells, Advanced Telematics, Admixture Dosing Unit, HARDOX Drums and many more features for varied applications such as Irrigation, Roads, Bridges, Buildings, Railways, Renewable Energy, Infrastructure projects etc.

AJAX, always believes in "CUSTOMER FIRST" focus and all its products are designed and manufactured in the state-of-the-art plant and backed by the widest dealer Network of over 35 Dealers with more than 100 Branch Offices to offer the best- in-class after sales support to ensure maximum uptime for its customers.

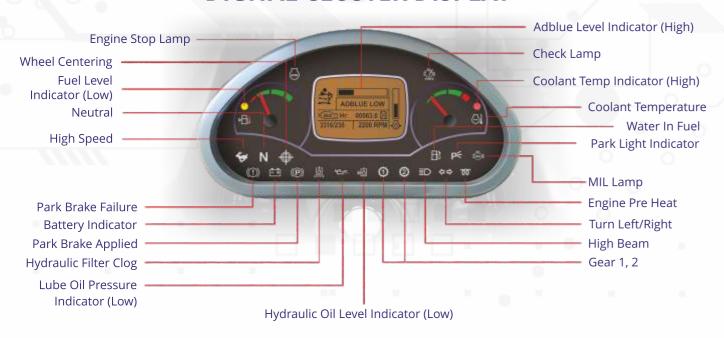

PROVEN & TESTED IN INDIAN TOUGH TERRAINS

- New fuel efficient CEV Stage-IV engine.
- Superior engine performance.
- Engine control unit (ECU) equipped with CRDI (Common Rail Direct Injection) system Provides higher output power and torque rise while offering exceptional fuel efficiency.
- ▼ The CEV Stage-IV Engine has After Treat System (ATS) consisting of Engine Gas Recirculation (EGR) and Diesel Oxidation Catalyst (DOC) which reduces the carbon emission and latest technology of Selective Catalystic Reduction (SCR) (from 110 hp) uses Adblue into the system.

DIGITAL CLUSTER DISPLAY

APPLICATIONS

CROADS

SALIENT FEATURES

3 WAY STEERING

3 way steering ensures tight turning radius and excellent manoeuverability, ideal for work in confined space

AUTO MIXING MODE

Auto mixing ensures complete mixing cycle due to pre-set duration resulting in the best-in-class homogeneous concrete.

TELEMATICS

FLEET

IoT enabled Fleet-tracking & monitoring system through telematics that also ascertains fuel efficiency, offline/online monitoring & real time reports

CENTRALIZED GREASING SYSTEM

#Enhances the life of internal components # Subject to conditions

REAR VIEW CAMERA

Vehicle reversing camera with display unit provides wider field of vision that helps in

ELECTRO HYDRAULIC DRUM CONTROL UNIT

Independent controls unit for varying Engine speed without affecting the Drum rotation resulting in best-in-class Fuel Economy with substantial cost savings

CABIN ERGONOMICS

Swivelable operator's post 180° provides good visibility both during driving, loading & discharging with bestin-class comfort & ease of operations to the operator

DRUM SWIVEL MODE

Gives an extra edge to the operator to reach the farthest point for placing concrete that provides operator better productivity & operator efficiency

ADMIXTURE DOSING UNIT A separate design unit for dosing admixer to the drum.

EMERGENCY PARKING BRAKE SYSTEM

Ensures Safety and hazard on any working & static condition

HYDRAULIC WET DISC BRAKES

Better control on terrains by engaging both front and rear axle in operation

LOAD CELL WEIGHING SYSTEM*

Load cell weighing system defines a paradigm Shift in concreting, with the fine & coarse aggregates

*Patent Applied for

AUTO CLEANING MODE

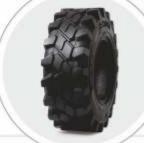

concrete setting and optimal

Auto cleaning facilitates complete water usage.

drum cleaning thereby minimizing

BI-DIRECTIONAL TYRES

Flat bi-directional tread pattern with high lug-to-void ratio equipped with void guard protection

SMART CBC (CONCRETE BATCH CONTROLLER)

Ensures desired quality of concrete is delivered as per mix design by allowing the operator to calibrate the quantity of aggregates into the mixer, User friendly switch controls, Alpha numeric keypad with TFT colour display, Multiple recipe option & storage up to 10000 batches with Water/additive auto cut-off

4 WHEEL DRIVE Truly an Off-roader acting as a tough terrain vehicle with good tight-

turning radius and higher

gradeability with Improved traction

contributing to better grip on

slippery & harsh terrains

Smooth flow of materials in to the drum with NO spillage

best-in-class weighing accuracy for cement,

Ease of operation with effective hydraulic controls sitting inside the operator's cabin having complete control over bucket, slide gate, loading arm, drum lift & drum swivel

BEST-IN-CLASS BENEFITS

HIGH PRODUCTIVITY

Parallel water-cement loading, Optimised site layouting helps in achieving optimal output, Single lever for lifting arm bucket & closed gate operations enhances productivity, best-in-class output

LESS FUEL CONSUMPTION

Less fuel consumption due to best-in-class power to weight ratio & auto mixing mode

AJAX GENUINE OIL

Specially designed hydraulic oil ensuring longer change intervals and regulates temperature for better performance, best-in-class performance

LOAD CELL WEIGHING SYSTEM

High accuracy leads to accurate weighing

resulting in best in class annual cost

savings

ZERO SPILLAGE

Closed gate bucket ensures zero spillage of materials, Controlled loading of aggregates, No wastage leads to best-in-class annual cost savings

avings

Can Traverse with concrete load on inclined terrains with zero spillage

Subject to condition

GRADEABILITY

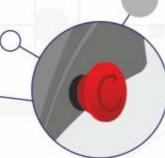

QUALITY & SAFETY STANDARDS

Robust built quality, Safest machine in any working conditions

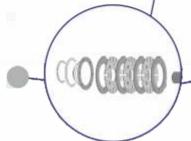

CERTIFIED HOMOGENOUS CONCRETE

Best in class providing homogeneous concrete mix and highest accuracy in weighing system compliant to IS Standards

EMERGENCY PARKING BRAKE SYSTEM

Ensures Safety and hazard on any working & static condition

HYDRAULIC WET DISC BRAKES

Better control on terrains by engaging both front and rear axle in operation

ARAI CERTIFICATION

ARAI Certification enables machine to drive on roads.
